jQuery Resources – 8 essential sites

di Paolo Franzese

Fonte: http://www.webdevlounge.com/articles/jquery_resources/

1. **The official site** – always a great place to start, documentation, downloads – your first stop.

2. **WebDesignerWall** – a great little hands on practical, tutorial/resource.

3. **Coda-Slider** – a jQuery version of Panic Coda's page slider. Extremely useful for portfolios, to slide projects in and out at the click of a button.

4. **jQuery Lightbox** – everybody loves the lightbox effect. This jQuery plugin takes lightbox and adds some very smooth transitions between images – great for image galleries.

5. **Digital Web Crash Course** – for people who want to know the workings of jQuery in order to create their own functions, this crash course is essential.

6. **Specky Boy Collection** – this is a really in-depth collection of links to various jQuery tutorials.

7. **jQuery for designers** – a web blog completely dedicated to jQuery tutorials, tips and tricks.

8. **Noupe.com** – this web development blog has a HUGE collection of advice and plugins for jQuery. The post you are linked to also contains links to 2 other posts – almost 90 different tutorials!
