

jQuery – Horizontal Accordion

di Paolo Franzese

[Questo](#) Plugin JQuery trasformerà qualsiasi UL (Unordered List) in un menù orizzontale.

Testato con Firefox 3 , IE 6, IE 7, Safari 3, Opera, Chrome, Konqueror

Alcune funzionalità:

- No dependencies
- Optional use of easing plugin
- Close and open content one after the other
- Close and open at the same time
- Choose trigger (mouseover, click ...)
- Easily control through external calls
- Open content on load
- Open content through hash tags in the url (#tab1, #tab2...)
- Position of handle (left, right)
- Mixed handle positions – 2 left , 2 right ...
- Cycle through content by interval
- Events when animations starts and ends
- Hide content until all has been assembled
