

FontCapture: Creare un Font online con la tua scrittura

di Paolo Franzese

Create a font from your own handwriting

At fontcapture.com you can create a font from your very own handwriting. There's no software to download and install, all you need is a printer and a scanner. Simply fill in the [font template](#), scan and upload it to our website, and download your completed font. The fonts you create using fontcapture.com can be used on both Windows and Mac computers.

Get started by [printing out the font template](#).
