

Google Fonts WordPress Plugin

di Paolo Franzese

The screenshot shows the WordPress.org Plugin Directory page for the 'WP Google Fonts' plugin. The page layout includes a top navigation bar with links like Home, Download, Extend, About, Docs, Blog, Forums, and Hosting. The main content area features the plugin title 'WP Google Fonts', a brief description, and a 'Download Version v1.8' button. A sidebar on the left contains search filters and popular tags. The right sidebar displays the plugin's requirements, average rating (5 stars), and compatibility information.

WP Google Fonts

The WP Google Fonts plugin allows you to easily add fonts from the Google Font Directory to your WordPress theme.

[Description](#) [Installation](#) [FAQ](#) [Screenshots](#) [Changelog](#) [Stats](#)

Google's free font directory is one of the most exciting developments in web typography in a very long time. The amazing rise of this new font resource has made this plugin the most popular font plugin on WordPress and it shows no signs of stopping. While font plugin solutions like FontBundles.com have helped bring rich typography to WordPress themes, the selection of fonts easily available to the average blogger have been limited. The WP Google Font plugin makes it even easier to use Google's free service to add high quality fonts to your WordPress powered site. Not only does this plugin add the necessary Google code, but it also gives you the ability to assign the Google fonts to specific CSS elements of your website from within the WordPress admin. Or if you would rather, you can target the Google fonts from your own theme's stylesheet.

Right now, the Google Directory has 77 great fonts, and the selection is steadily growing. As new fonts are added, we will release updates to the plugin quickly so you can start using new fonts as they become available. It truly is an exciting time to be creating websites, and I hope this plugin helps you create some great stuff. - Adrian

Ho appena installato su www.nostromatrimonio.it un plug in di Wordpres per la gestione dei font con Google Font Directory.

Prime sensazioni? Ottimo Plug in che ti rende semplicissima l'integrazione di Google Font: [Google font wordpress plugin](#)

Si gestisce semplicemente nel box Apparence, accedendo alla lista dei font disponibili e con la possibilità di personalizzare l'effetto dei font sul sito.

Voi lo userete? Fatemi sapere...
