About

The Plugin

jRumble is a [jQuery](#) plugin that rattles, vibrates, shakes, and rotates any element you choose. It's great to use as a hover effect or a way to direct attention to an element. You can control the X, Y, and rotation range, the speed, and event trigger for this feature.

Note: jRumble is currently a little buggy in internet explorer. A number of people have tried to fix the issues, there is currently no solution on any objects at all.

Please read this before using jRumble: Fixing and Recovery efforts on the [author's blog](#). Please use this plugin responsibly.

The Author

My name is [Jack Rumble](#). I am a 23 year old web and graphic designer living in Colorado, playing in major leagues, and trying to make the world a better place. I love playing music and watching movies. You can follow me on Twitter: [@jrumble](#).

Like the Plugin?

The plugin is free to you. However, if you enjoy jRumble and want to show some support, feel free to leave a donation. It would be greatly appreciated!

Usage

Include jQury and jRumble

Include jQury and jRumble just before your closing body tag. What have the path to your files in current. I recommend including through [Google Libraries API](#).

[jRumble](#) è un plugin per jQuery che brontola, vibra, scuote, e ruota ogni elemento si sceglie. È bello da usare come effetto hover o per dirigere l'attenzione su un elemento. È possibile controllare la gamma X, Y, e la rotazione, la velocità e l'innesto di eventi per il rombo.

Cosa ne pensate?
