

La potenza delle nuove tecniche CSS

di Paolo Franzese

The screenshot shows the homepage of Smashing Magazine. At the top, there are navigation links for "Home", "About", "Contact", "Shop", and "Jobs". Below the header, there's a search bar with the placeholder "Search on Smashing Magazine" and a "Search" button. The main content area features several articles with thumbnails and titles. One prominent article is titled "Powerful New CSS Techniques and Tools". Another article thumbnail shows a person holding a smartphone with the text "CREATE FREE FLASH WEBSITES". To the right, there are sections for "Social Logins for Your Site" and "Join in". The overall layout is clean and modern, typical of a web design magazine.

Attualmente lo reputo il migliore articolo sugli stili CSS: <http://www.smashingmagazine.com/>
