

La potenza delle nuove tecniche CSS

di Paolo Franzese

The screenshot shows the homepage of Smashing Magazine. At the top, there's a navigation bar with links for Home, Recent, Shop, and Join. Below the header, there's a large banner for "Powerful New CSS Techniques and Tools". To the left, there's a section for "CREATE FREE FLASH WEBSITES". The main content area features several article thumbnails, each with a title and a small image. One visible article is titled "111,124 FREE CSS TEMPLATES FREE". Other sections include "activeCollage", "We test your website", and "join us". The overall design is clean and modern, typical of a web design magazine.

Attualmente lo reputo il migliore articolo sugli stili CSS: <http://www.smashingmagazine.com/>
