[Dow Jones] Gann’s 90-years Master Cycle on DJIA

di Paolo Franzese

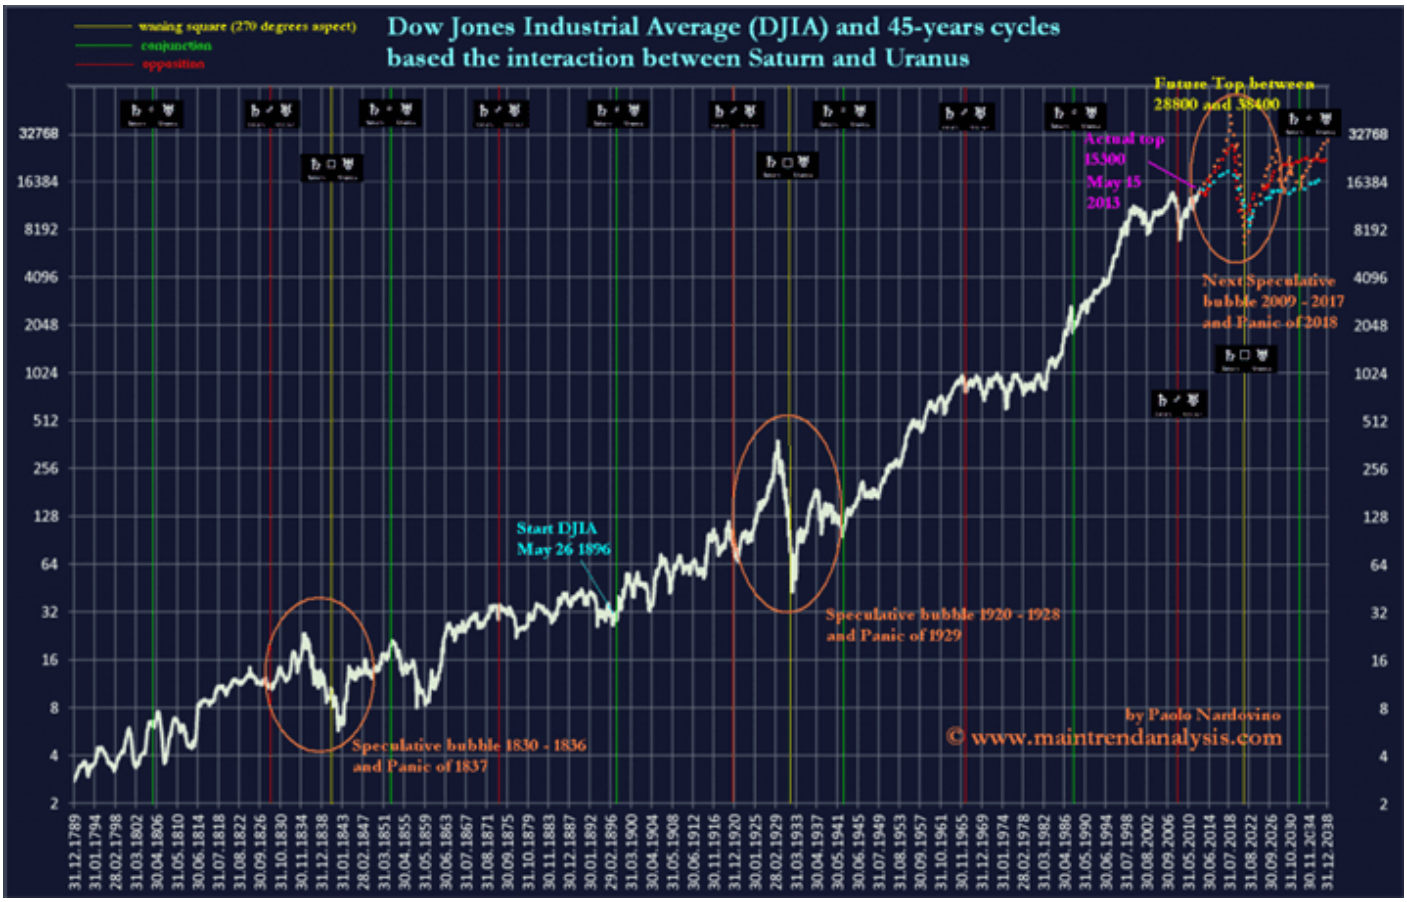

I have this projection on the Dow Jones Industrial, with the future top [between 25800-38800] to do in the period 2016 – 2017
and a strong decline in 2018 until 2021-2022 where there will be a minimum of panic selling, which will mark the end of more severe bear market in history.

This following the Gann’s 90-years Master Cycle
which has intercepted the previous great bubbles and crises of 1836-1842 and 1929-1932.
